

Dutch translation available for your extensions?

Posted by WoodyF4u - 2014/05/15 10:37

Searching for a special extension for Joomla! I found your site. I'm very interested in Meeting Schedule V1.0

I'm a translator for a couple of Joomla! extensions. The biggest one is JEvents. As payback for the work, I may use the extensions for free. Maybe I can do the Dutch translations for you.

Do you need a translator for the Dutch language?

Please let me know.

Best regards,

Wouter

The Netherlands

Your captcha code is very difficult to read !

Hi,

Is the quality of the forum the same as your extension?

I have posted a question and received a couple of spam messages.

Is here anybody human who is reading this forum?

We know that our internal captcha plugin is not easy but as you may had noticed, it is not enough yet to forbid spammer to post messages.

Concerning the dutch translation, if you want to do it, it will be welcome.

This "meeting schedule" extension has very few message and that would be very fast to do the translation.

For the moment, it only exists in EN, FR, PT

There is moreless 200 text to translate
